Summary

Motivated Computer Science student specializing in Machine Learning with experience in Python, Java, SQL, and machine learning fundamentals. Passionate about solving real-world problems through AI, continuously learning new technologies, and contributing to innovative projects. Seeking opportunities to gain hands-on experience while growing as a future Machine Learning Engineer.

Work Experience

ACADEMIC & ORGANIZATIONAL LEADERSHIP

Tech Coordinator | NU Wizard's Circle (National University)

March 2025 - 2026

- Provided direct technical support and troubleshooting for organizational hardware, software, and networking issues, ensuring seamless operations for all organizational events and meetings.
- Managed the creation and deployment of online forms and data collection systems (e.g., Google Forms, custom scripts) to efficiently gather, organize, and analyze member registration, feedback, and event attendance data.

Educational History

BACHELOR OF COMPUTER SCIENCE SPECIALIZATION IN MACHINE LEARNING

National University - Manila

2024 - Present

- Consistent University Scholar (2024 - Present)

Projects

GEOSPATIAL FLOOD RISK PREDICTION

Technologies: Python, XGBoost, Streamlit, Folium

- Developed a machine learning web application that predicts flood risk using geospatial and environmental data.
- Built an XGBoost classification model for flood risk prediction.
- Integrated Folium for interactive map visualization and Streamlit for real-time predictions.
- Deployed the application for public access.

Relevant Skills

- Proficiency in Python, Java, C
- Data Structures and Algorithms
- Machine Learning (scikit-learn)
- Testing and debugging techniques
- Relational Database and SQL
- Adaptability and continuous learning
- Object-Oriented Programming (OOP)

Affiliations & Awards

NU WIZARD'S CIRCLE IDEATHON 2025

Ideathon

2nd Placer - Overall

INFORMATION TECHNOLOGY SPECIALIST - DATABASES (CERTIPORT / PEARSON)

Certification

Industry-recognized certification demonstrating knowledge of database concepts, SQL, data modeling, and data management.

MICROSOFT LEARN - INTRODUCTION TO MACHINE LEARNING

Training

Completed introductory training covering machine learning fundamentals, supervised and unsupervised learning, model evaluation, and AI concepts
